Project Team

Lucia Rapanotti, Production Manager and co-Chair of the Virtual MPhil. She is a Senior Lecturer in the Computing Department, with a *Laurea Cum Laude* (Milan, Italy) and a PhD (Newcastle upon Tyne, UK) in Computer Science. She is a Member of the Editorial Board of Expert Systems and a Member of the BCS. Previously she was Editor-in-Chief of Expert Systems, and Secretary of the BCS Requirements Engineering Specialist Group. Her main research focus is the engineering design of software intensive systems, and she has published widely in international conferences and journals. She is a member of numerous international programme committees. Lucia has been with the OU since 1996. She has worked on many courses and award boards at undergraduate and postgraduate levels, with roles which span from educational software design to academic authoring and editing, to production and presentation chair. For more information, please see <http://mcs.open.ac.uk/lr38/>.

Leonor Barroca, co-Chair of the Virtual MPhil. She is a Senior Lecturer in the Computing Department with a PhD (Univ. Southampton) in Computer Science. Her research is in the Software Engineering area where she has published in international conferences and journals and been a member of international conferences programme committees. Leonor has been with the OU since 1994, mainly involved in the Computing postgraduate programme, having chaired the whole programme and the production and presentation of several of its courses. She is currently chairing M885 (Analysis and Design of Enterprise Systems) and recently been an author in M363 (Software Engineering with Objects). She is the Postgraduate Admissions Tutor for Computing, and she is also a member of the NIIT partnership team.

Maria Vargas-Vera, Academic Member of the Virtual MPhil. She is a Lecturer in the Computing Department. She received her PhD from the Artificial Intelligence Department at Edinburgh University in 1995. Her current research focuses on Automatic Construction of Ontologies from Text, Ontology Mapping and E-Learning Applications using Semantic Web Technologies. Dr Vargas-Vera has published research papers in international conferences and journals and she is also a member of program committees of international conferences and workshops. Dr Vargas-Vera is an Associated Editor of the Journal of Emerging Technologies in Web Intelligence (JETWI), "Revista Iberoamericana Computacion y Sistemas" and the International Journal of Knowledge and Learning (IJKL).
